Problem Statement
The Chromecast is a new platform ripe for social gaming that has yet to be tapped. Very few people have taken the time to create quality additions for this platform, and that is something we want to change with our Chromecast application.

Project Objectives
Utilize the Chromecast platform to develop a multiplayer poker game
There will be separate Chromecast and android interfaces
There will be an AI system to play against the user
Use multiple android devices to play through one chromecast
All involved devices need to be synced
Information needs to be exchanged using two way communication between devices

Stakeholders
Users
Chromecast and android users
Customers
        Chromecast and android users
Software Developers
        Yong Sun Hong
        Joe Koncel
        In Hwan Lee
        Anthony Natoli
        Brandon Porter
        Ben Wencke
Development Managers/Project Coordinators
        Team Leader: Anthony Natoli
        Project Coordinator: Mingyuan Wang

Deliverables
Google Cast Framework
Android and Chromecast platforms
